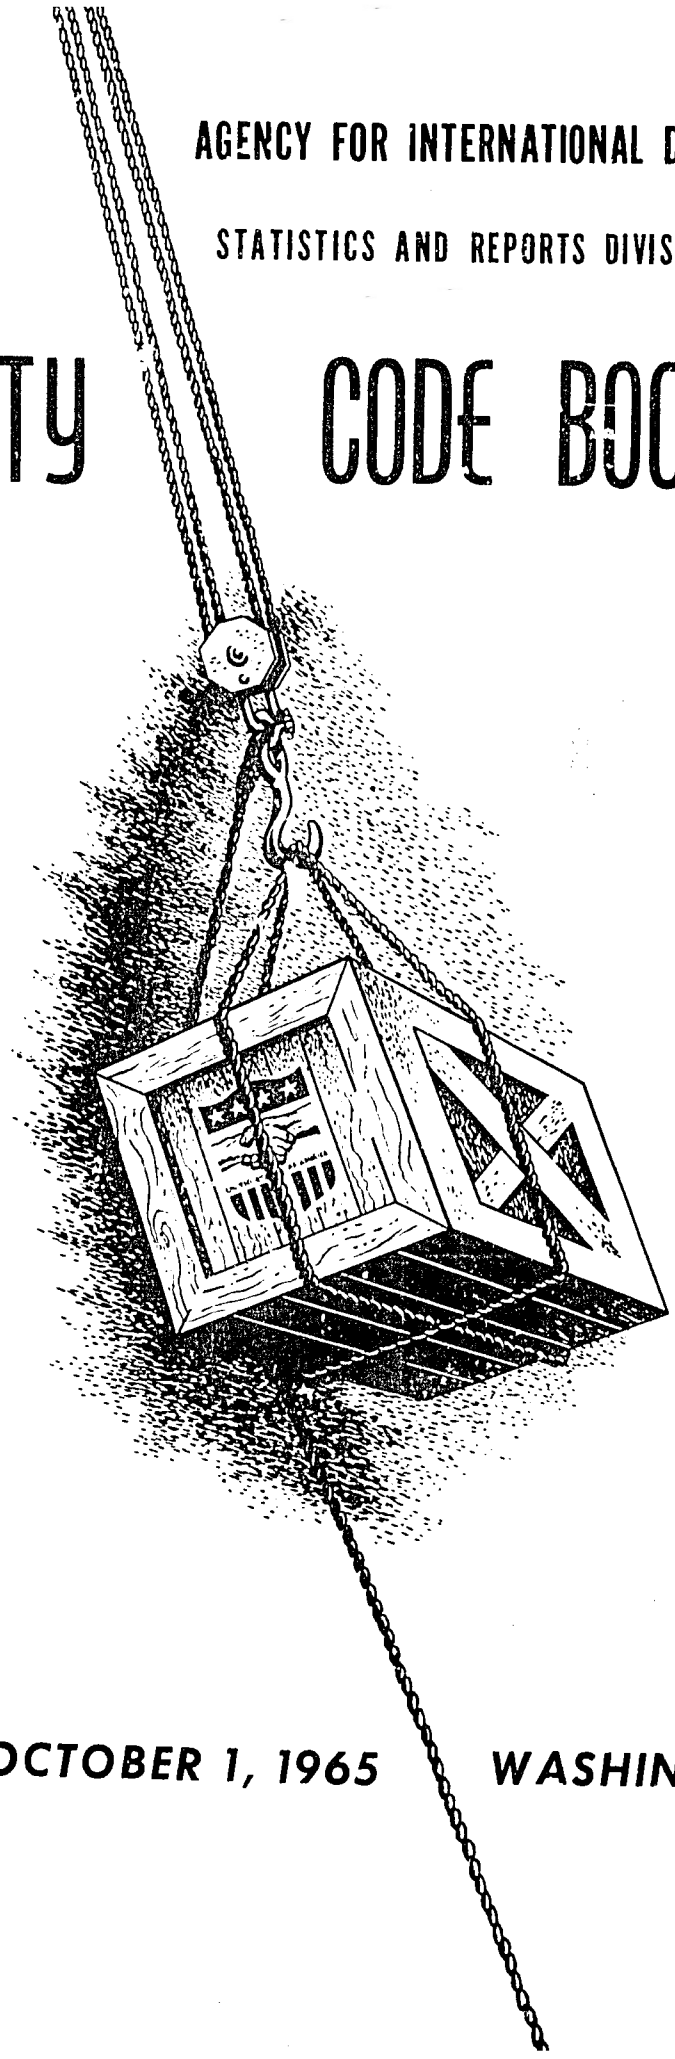
COMMODITY CODE BOOK



OCTOBER 1, 1965 *WASHINGTON, D.C.*

M.O. 1405.1

A.I.D. COMMODITY CODE BOOK - EFFECTIVE OCTOBER 1, 1965

I N T R O D U C T I O N

This new AID Commodity Code Book, which supersedes the July 1, 1963 edition, is based on the January 1, 1965 Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States. It takes into account the very extensive changes made in Schedule B between 1963 and 1965 and in the Public Bulletins issued since January 1, 1965.

This code book must be used for all AID documentation prepared after September 30, 1965.

This new code book contains a list of 95 groups into which the items in this code system may be classified. The groups are identified by 3-digit numbers on the left-hand side of the description. Under each commodity group there appear brief descriptive titles which indicate the nature of the commodities or other items included in the group. Each of these titles is identified on the left-hand side of the page by a 4-digit AID code number and on the right-hand side of the page by one or more 7-digit numbers, where there is a tie-in with Schedule B export codes. These 7-digit numbers are the commodity code numbers which identify the commodities as described in the Schedule B, January 1, 1965 edition, or in the Public Bulletins issued since that date.

It is the intent of the AID commodity list to enable users to identify commodities uniformly in terms of AID 4-digit numbers. In order to do this, it is recommended that each user obtain a copy of the above-mentioned Schedule B directly from the U.S. Government Printing Office in Washington, D.C. With the aid of the Schedule B-AID Cross-Reference List, included in this issuance, the 7-digit Schedule B numbers may be converted to the appropriate AID Commodity Codes. (See pages II-14.)

The AID Commodity Code Book is intended to insure a common understanding among AID offices, recipient countries, suppliers and prospective suppliers, persons or organizations charged with making payments under the AID program, and persons or organizations interested in the commodity composition of AID programs, as to the coverage of each AID commodity group.

Inquiries regarding this AID Commodity Code Book should be addressed to:

Statistics and Reports Division
Agency for International Development
Washington, D.C. 20523

Amendments that may be made to the Code Book in the future will be announced in Small Business Memos, which are made available without charge to interested persons and firms located in the United States. Requests to be placed on the mailing list to receive Small Business Memos should be addressed to:

Office of Small Business
Agency for International Development
Washington, D.C. 20523

Persons, firms, or government instrumentalities located outside the United States and desiring to receive future Code Book amendments should direct their requests to the Statistics and Reports Division, as indicated below.

M.O. 1405.1

STATISTICS AND REPORTS DIVISION
AGENCY FOR INTERNATIONAL DEVELOPMENT
WASHINGTON, D.C. 20523

SPECIAL NOTES ON A.I.D. COMMODITY CLASSIFICATION*

1. Each separate commodity group, with the exception of certain "basket" codes provided for user convenience, is mutually exclusive.

   This principle is important to any classification system whether it be a classification of birds or traffic accidents or commodities. The user of any system of commodity classification has a right to expect that any particular commodity will be classified in only one place in the system. We have attempted to follow this principle in AID commodity coding.

2. The classifications established are all-inclusive. The AID classification attempts to provide for every commodity which AID is willing to finance.

3. Each AID commodity classification is specifically and definitely limited to the equivalent Schedule B commodity codes to which the AID code is related and which are provided in the AID Code Book opposite the AID code. In general, the AID system of commodity classification is much less detailed than in Schedule B, so that oftentimes a whole series of Schedule B codes are equivalent to only one AID code number.

   In consulting Schedule B, it is important to note that Schedule B includes not only the generic descriptions of the commodities, which are the basis of the classifications, but also in many cases specific brand names and trade names, which may vary even from one part of the United States to another, and in some cases may not be the familiar or customary names of the products abroad. It is important to bear in mind that <u>these listings in Schedule B are only illustrative</u>; they are not an essential part of the classification; they are printed as a convenience and an accommodation to provide guidance to clerks and other nontechnical persons involved in making out Shipper's Export Declarations, since these persons may have available to them on invoices or commercial papers only the trade or brand names.

   The listings of individual items and trade names included under a given Schedule B classification are not necessarily complete or exhaustive; they represent for the most part, only those items which have at some time been exported in some value. It is impossible to list or anticipate every commodity or item that now appears or will appear in U.S. trade. Sound judgment should be used to classify those items not specifically listed, according to composition, and usage, following the classification of the current Schedule B. If no classification can be located which specifically includes the item by name, it should be classified under the most specific one of the classes for the material of which it is made which does not specifically exclude it.

**These notes on the principles of commodity classification were adapted from a phamplet originally prepared by the Bureau of the Census for the Industry Advisory Committees.*

4. The classification is based primarily on the basis of the material of which the product is made, or which is the chief weight, or in some cases the chief value of the product (wood, metal, etc.), and on the structural or functional form of the product (raw cotton versus textiles, etc.) at the stage it is financed by AID. In a relatively few cases, the classification is based on the use to which the product is to be put.

   Although this principle of classifying commodities on the basis of their condition when financed by AID occasionally works some hardship in its application to commodities purchased offshore where end-use classifications may be more prevalent, it is far easier for most U.S. suppliers than if the AID system were based primarily on end-use, since this would be inconsistent with the Schedule B classification which the supplier already has followed in preparing his export declaration. The reason for this is obvious. The U.S. exporter, bank or AID voucher examiner may not know the use to which the commodity is to be put after it reaches the foreign country and therefore cannot provide the information required to classify export shipments into use classifications.

5. The classification attempts to reflect normal trade practices particularly with respect to customary groupings of spares, accessories, and parts wherever possible.

   The principle stated above is one of the important objectives of Schedule B, on which the AID code is based. An illustration of this principle is provided in connection with automobiles and tires financed by AID. Automobiles for export normally are equipped with a spare tire. This normal "spare" is included in the cost of the vehicle and the entire transaction is classified with Motor Vehicles, Engines, and Parts. The classification for tires is used only for exports of tires as such and not for tires exported as spares accompanying an automobile. In this case the commercial practice is well-known; in some other cases the commercial practice is not well-known, is inconsistent from supplier to supplier, or varies in other countries.

COMMODITY ELIGIBILITY

The listing of a commodity in the AID Commodity Code Book does not necessarily imply that such commodity is eligible for AID financing. USAIDs provide guidance to cooperating countries regarding eligibility of commodities. The cooperating countries, in turn, review and control AID-financed commodity procurement by their importers to assure that AID policy on commodity eligibility is met. Suppliers comply with any special instructions in purchase orders, letters of credit, or other documents pertaining to commodities that may be furnished. Inquiries regarding eligibility for AID financing of any specific commodity may be addressed to "Agency for International Development, Washington, D.C. 20523. Attention: Office of Material Resources."

A.I.D. Code No.		Description	U.S. Dept. of Commerce Schedule B Commodity Code Nos. (January 1, 1965 Edition)
010		**BREAD GRAINS**	
	0101	Wheat and Wheat Flour	041.0020, 046.0020-046.0050
	0103	Rye	045.1000
020		**COARSE GRAINS**	
	0201	Corn	044.0020-044.0040
	0202	Grain Sorghums	045.9010
	0203	Oats	045.2000
	0204	Barley	043.0000
030		**RICE, ROUGH AND MILLED**	
	0303	Rice, Rough and Milled	042.1010-042.1020, 042.2020-042.2040
040		**OTHER GRAIN PREPARATIONS**	
	0407	Malt and Malt Flour	048.2000
	0408	Dietetic Foods, NEC	048.8440

881	**LABORATORY EQUIPMENT AND SUPPLIES**	
8811	Laboratory Equipment and Supplies	This code may be used to designate equipment and supplies for laboratory use which would otherwise be listed under multiple A.I.D. commodity codes and which are shown in various Dept. of Commerce Schedule B Groups. Examples: Tongue depressors, rubber tubing, retorts, chemicals, bunsen burners, surgical cotton, etc.
		This code has been established to simplify coding operations. Its use should be limited to situations where procurement for an approved project or by an end user laboratory, hospital, clinic or school calls for relatively small quantities and values of numerous separately codable items not exceeding $10,000 in total. Code 8811 should not be used to cover commodities imported for resale nor for quantities of items under any given code having an estimated value of $5,000 or more.

[a/] Industrial tractors are classified in Code 7408; industrial tractors are wheel-type tractors, used for material handling in and around industrial plants, docks, and terminals. They may be powered by internal combustion engines, or electric storage batteries and may or may not be equipped with conveying, lifting, or stacking devices. Tractor engines are included with internal combustion engines in Code 7308. Code 833 may include attachments when purchased as a unit.

SCHEDULE B - A.I.D. CROSS REFERENCE LIST

The following example is intended to illustrate the use of the Schedule B - A.I.D. Cross Reference List: A specific commodity, carbon steel wire rod is to be classified under the appropriate A.I.D. 3-digit and 4-digit codes. Reference to the Schedule B shows that "Carbon Steel Wire Rod" is coded under Schedule B 673.1400. Reference to the Cross Reference List shows that Schedule B 673.1400 falls in the 673.1310-673.5400 range and therefore is classified under A.I.D. 4-digit code number 6613, Bars and Rods. The proper A.I.D. 3-digit code for this commodity is 660, since 6613 is a subbreakdown listed under this code. The Cross Reference List begins on page 11.
